

# Digi-Star Product Bulletin

In order for Digi-Star to meet the needs of all customers, 30K and 50K CT's will be modified to include additional anti-rotation flats. These flats, located on the lower 2.437 diameter base and spaced at 2.125", will allow greater flexibility for the OEM while maintaining the load cells weighing performance.

As the additional anti-rotation flats will have no adverse effect on form, fit, or function, they will be added as a running change in the near future. The change will be made first on 30K CT's then on 50K CT's. Once the transition occurs, the change will be permanent.

Please feel free to contact Digi-Star for more information on this product change.

## Product Affected:

P/N	Product	Accuracy
148008	Cell CT 30KTC - 30'	0.10%
153101	Cell CT 30KTC - 30'	0.25%
403102	Cell CT 30K - 30'	0.25%
153102	Cell CT 50KTC - 30'	0.10%
153103	Cell CT 50KTC - 30'	0.25%
35018	Cell CT 50KTC - 30'	0.25%
403275	Cell CT 30KTC - 30'	0.10%
